

AOS/NIES 171
Prof. Hitchman

Oral Assignment #1

“Explain That Graph!”

10 points

“Your assignment, should you choose to accept it”¹, is to consider a particular image and describe what you think are the most important aspects with respect to our changing world. You may consult with your fellow agents and identify your image via the “information porthole” <http://www.aos.wisc.edu/~aos171/hw171.html>. It will prove to be advantageous to coordinate with your fellow agents via “email” regarding which part each person will present. Please report your findings on Tuesday February 5. You will each have two minutes.

You will receive 5 points for your oral contribution and 5 points for a written description of your contribution. Your written description should only be a few paragraphs and should include 1) a description of the relevance of your team’s image in terms of “the big picture” and 2) a brief description of your individual contribution. It should fit in the space below.

¹Mission Impossible TV show (1966-1973)
