

CLIMATE CHANGE LIVE

A DISTANCE LEARNING ADVENTURE

HOW YOUR CLASS CAN HELP

We'll show you what your class can do and give you the tools and resources to do it.

KIDS ON CLIMATE CHANGE

Students will play a key role in solving our climate change problems.

Empower Your Students to Make a Difference!

2013-2014 SCHEDULE OF PROGRAMS

TWO-PART WEBCAST

March 5 and 12, 2014 - Middle and High School

Get your students engaged in the science of climate change and excited about what young people can do to help! This webcast series will introduce the basic science of climate change, foster a dynamic online discussion, and show how students are making a difference in addressing climate change.

Educate, Inspire and Engage

The March 5, 2014 webcast will feature:

- Climate Change 101, an energetic presentation by the award-winning Alliance for Climate Education (ACE)
- Student moderators
- Videos of student-led projects from across the country
- Student perspectives that will set the stage for the second webcast

Join the Conversation!

The March 12, 2014 webcast will feature:

- LIVE interactive conversation about climate change
- Simultaneous video chat, Facebook comments and Twitter feeds
- Audience-driven topics and responses from climate scientists and field experts
- Discussions about how climate change is affecting different countries
- What kids are doing to help their community

WEBINAR SERIES: Teaching Climate Change

Take Your Class on a ClimateChangeLIVE Distance Learning Adventure!

Sept. 25, 2013 – 7:30-9:00PM ET

Learn about science-based climate change education resources, the webinar series, and interactive, webcasts planned for the classroom.

Teaching and Communicating about Climate Change

Oct. 23, 2013 – 7:30-9:00PM ET

Are you just starting to teach about climate change? ClimateChangeLIVE will help you sort out the facts and be confident in educating your students about this important topic.

ClimateChangeLIVE Education Resources Highlights – Part 1

Nov. 20, 2013 – 7:30-9:00PM ET

Learn about the wealth of climate change education resources and programs from 17 Federal agencies and non-profit organizations who provide trusted, science-based materials correlated to the national science education standards.

ClimateChangeLIVE Education Resources Highlights – Part 2

Dec. 11, 2013 – 7:30-9:00PM ET

This webinar provides more climate change education resources for the classroom.

Professional Development Programs for Climate Change Education

Jan. 29, 2014 – 7:30-9:00PM ET

Learn about professional development programs to empower you as a climate change educator! Each program offers training to increase your understanding of essential climate concepts for your classroom.

GreenWorks! Action Grants for ClimateChangeLIVE Participants

Feb. 19, 2014 – 7:30-9:00PM ET

Learn about how your school can accomplish action projects that address climate change solutions. We'll also highlight success stories from schools in our GreenSchools! program. Schools that participate in ClimateChangeLIVE will be eligible to apply for GreenWorks! grants.
