

- 1931: Die Wirksamkeit einer Grossen Stadt als Quelle der Luftverschmutzung (Effectiveness of a large city as source of air pollution) — Gerlands Beitr., Geophys., Vol 31 p318+
- 1933, with W. Schwerdtfeger: Vertikal Austausch in unmittelbarer Berechnung (Vertical exchange process directly derived using free-balloon observations of vertical wind and mixing path) Meteorol. Zeitschr., Vol 50 p47+ John M. Lewis: The Lettau-Schwerdtfeger Balloon Experiment: Measurement of Turbulence via Austausch Theory. *Bulletin of the Amer. Meteorol. Soc.*, Vol. 78, No. 11, Nov. 1997, 2619 - 2635
- 1933, 34, 36, with W. Schwerdtfeger: Untersuchungen ueber atmosphärische Turbulenz und Vertikal Austausch vom Frei-Ballon aus (Investigation of atmospheric turbulence and the vertical exchange coefficient from a manned balloon). Progress reports on 3-year Balloon flight program, 3 installments — Meteorol. Zeitschr., Vols 50 p250+, 51 p249+, 53 p44+
- 1934: Atmosphärische Zirkulation auf der Noerdlichen Halbkugel im Lichte der Turbulenz Vorstellungen (Atmospheric circulation of the northern hemisphere in the light of macro-turbulence concepts) — Annalen Hydrographie & Maritim, Meteorol., Vol 62 p252+
- 1934: Turbulente Schwankungen von Wind und Temperature in der bodennahen Luftschicht (Turbulent fluctuations of wind and temperature in the air layer near the ground) — Annalen Hydrographie & Marit., Meteorol., Vol 62 p489+
- 1935: Luftmassen und Energie Austausch zwischen niederen und hohen Breiten der Nord-Halbkugel waehrend des Polarjahres 1932/33 (Exchanges of air mass and [kinetic] energy between low and high latitudes of the northern hemisphere during the [international] polar year 1932/33 — Beiträege Physik Atmosph., Vol 23 p45+
- 1936, with Katharina Doerffel: Der Wasserdampf Uebergang von einer nassen Platte an stromende Luft (The vapor transfer from a wet plate to an air stream [wind tunnel experimentation]) Two installments — Annalen Hydrographie & Maritim, Meteorol., Vol 64, p342+, and p504+
- 1937: O.G. Sutton's Theorie der Verdunstung in turbulenter Luft im Vergleich zu neueren Beobachtungen (O.G. Sutton's theory of evaporation into a turbulent airstream compared with [and verified by] recent observations) — Annalen Hydrographie & Maritim, Meteorol., Vol 65 p155+
- 1937, with Katharina Doerffel & M. Roetschke: Luft-Koerper Alterung als Austausch Problem auf Grund von Staub & Kern-Gehalts Messungen (Air mass modification as exchange-process problem evaluated by measurement of dust and condensation nuclei concentration) — Meteorol. Zeitschr., Vol 54 p16+
- 1937: Weiterfuehrung der Freiballon Untersuchungen ueber effektiven Vertikal Austausch und Luftmassen Alterung mit Anwendung auf die Frage der Landverdunstung (Continuation of free-balloon measurements of air mass modification including application to problems of land surface evaporation) — Meteorol. Zeitschr., Vol 54 p406+
- 1938: Atmosphärische Turbulenz; 283 pages, Academ. Verlags Ges., Leipzig (Atmospheric Turbulence; a monograph with 12 chapters, dealing with fluid dynamics background, introducing the concept of the planetary boundary layer, and summarizing structure and effects of turbulence and exchange processes of scales ranging micro to global). The book grew out of a Univ. of Leipzig course during the 1937/38 semester. It incorporates own research work with relevant publications in national and international literature.

- 1938: Kern und Staubgehalt der Bodenluft und die atmosphaerische Schwaechung der Sonnenstrahlung ueber Afrika und den angrenzenden Meeren (Condensation nuclei and dust content of air in relation to insolation reduction above Africa and surrounding oceans) -- Gerlands Beitr,Geophys, Vol55 p103+
- 1938: Versuch einer Bilanz im Kondensationskern Haushalt der Troposphaere im Durchschnitt fuer die ganze Erde ((First) attempt of a global balance for tropospheric condensation nuclei) -- Annalen Hydrographie & Maritim,Meteorol,Vol 67 p551+
- 1941: Das Austausch Paradoxon von Wilhelm Schmidt (Wilhelm Schmidt's austausch paradox). (briefly stated: In 1921 Schmidt knew that in daily and seasonal means, potential temperature increases with height by 0,5 C/100m while the continentwide mean of his austausch coefficient is  $A= 50$  g/(cm,sec), yielding a heatflux of 60 ly/day equal to 51 watt per squaremeter, paradoxically from air to ground,] -- Annalen Hydrographie & Maritim,Meteorol,Vol 69 p400+
- 1941: Ueber die Zeit- und Hoehenabhaengigkeit des Austausch Koeffizienten im Tagesgang innerhalb der Bodenschicht (About time and height dependency of the mass exchange during its diurnal variation in the air layer near the ground) -- Gerlands Beitr,Geophys,Vol 57 p171+
- 1941: Anwendung neuerer Ergebnisse der Austauschlehre auf zwei luftelectrische Fragen (Application of new exchange-process theory to two problems of atmospheric electricity) -- Gerlands Beitr,Geophys,Vol 57 p305+
- 1942: Ueber das naechtlliche Nebenmaximum beim taeglichen Gang des vertikalen Austausch Koeffizienten im Zusammenhang mit meteorologischen Erscheinungen (About the nocturnal secondary maximum in the diurnal variation of the coefficient of vertical exchange in relation to meteorological observations) -- Gerlands Beitr,Geophys,Vol 59 p150+
- 1944: Die thermodynamische Beeinflussung arktischer Luftmassen ueber warmen Meeres Flaechen als Problem der meteorologischen Stroemungs- und Turbulenz Lehre (The thermodynamical modification of arctic air masses when moving over warm ocean areas, as problem of meteorological turbulent fluid dynamics) -- Schriften Deutsch,Akademie Luftfahrt Forschung Vol 8 p85+
- 1947: Zur Theorie der partiellen Gasentmischung in der Atmosphaere (On the theory of partial separation of gaseous constituents in the atmosphere) -- Meteorol,Rundschau Vol 1 p5+, and p65+
- 1949: Dynamik der Atmosphaere, in: FIAT Review of german Sciences 1939-1946, Vol 19 (Meteorologie und Physik der Atmosphaere-R.Muegge, ed) pp 116-171, Dieterich's Pub,Comp,, Wiesbaden, [Includes sections on turbulence in general and atmospheric fluid dynamics],

- 1949: Isotropic and non-isotropic turbulence in the atmospheric surface layer -- A.F.Cambridge Res.Center; Geophys.Res Papers No.1. [Introduces a dimensionless characteristic which is equivalent to the characteristic length proposed 5 years later independently by and named after Monin and Obukhoff].
- 1950: A re-examination of the "Leipzig Wind Profile" considering some relations between wind and turbulence in the frictional layer -- Tellus (Stockholm) Vol.2 p125+. [Re-examination of the "kinematic wind vector profile" is supplemented by the "dynamic stress vector profile" I.
- 1951: Diffusion in the upper atmosphere -- pages 320 to 332, Section "The Upper Atmosphere" in: Compendium of Meteorology (T.F.Malone, ed) Amer Meteorol Soc., Boston MA, 1334 pp
- 1952: Austausch -- Article 3286, pages 686 to 674, Volume "Astronomie und Geophysik" (J.Bartels & P.Ten Bruggencate, eds), LANDOLDT-BOERNSTEIN TABLES,6th Edition; Springer Berlin, 795 pp
- 1952: The present position of selected turbulence problems in the atmospheric boundary layer - On eddy diffusion in shear zones -- Geophys.Res,Papers No 19, pages 49+ and 347+
- 1953, with B.Davidson: The Great-Plains turbulence field program -- Weatherwise (AMS) Vol 6 p166+. [Preliminary report].
- 1954: Notes on the transformation of mechanical energy from and to eddying motion -- J.Meteorol. Vol 11 page 121
- 1954: A study of the mass, momentum and energy budget of the atmosphere -- Archiv Meteorol., Geophys.& Bioklimat., Series A, Vol 7 p 133+
- 1954, with W.Baginsky, N.Sissenwine,& B.Davidson: Review of time and space wind-fluctuations applicable to conventional ballistic determination -- Air Force Surveys in Geophysics, #63
- 1955: Turbulence in the stratosphere -- Bulletin AMS Vol 36, p 178+
- 1955: Note on horizontal diffusivity for large-scale tropospheric currents -- J.Meteorol.,Vol 12 p 410+
- 1955: Mean temperature above airport runways -- Geophys.Res.Direct,informal report 7 pages.
- 1956: Note on the structure of the atmospheric surface layer -- J.Meteorol.,Vol 13 p 507
- 1957: Windprofil, innere Reibung, und Energie Umsatz in den unteren 500 m ueber dem Meer (Wind profile, internal friction, and energy transformations in the lower 500 m above the sea) -- Beitr.Physik Atmosph.,Vol 30 p 70+. [Re-evaluation of windprofile measurements at the Scilly-Islands reported by Sheppard; he had claimed that there is no spiral-type profile; I show that wind-spirals exist when thermal wind is taken into account].
